USA First World War Era Bayonets

M1905: Sword bayonet developed for use on the .30" caliber U.S. Rifle M1903, as redesigned in 1905/06. The M1905 bayonet was also used with the M1 Garand and M1903A3 rifles.. The M1892 bayonet was seen as too short for the M1903 rifle, so a longer bayonet was designed (the M1892 bayonet mounts to the M1903 rifle just fine).. As evidenced by the markings, the bayonet and

List Of Screw Drives Wikipedia

The slot screw drive has a single slot in the fastener head and is driven by a common blade or flat-bladed screwdriver. It was the first type of screw drive to be developed, and for centuries it was the simplest and cheapest to make. Uniquely among common drives, it is straightforward to manufacture a slot head or drive by hand.

Screw Wikipedia

A screw will usually have a head on one end that contains a specially formed shape that allows it to be turned, or driven, with a tool. Common tools for driving screws include screwdrivers and wrenches. The head is

usually larger than the body of the screw, which keeps the screw from being driven deeper than the length of the screw and to provide a bearing surface.
